FLUSHING COMFORT WITHIN REACH

TECEflushpoint: the attractive
pneumatic toilet remote control
for single or dual flush systems.

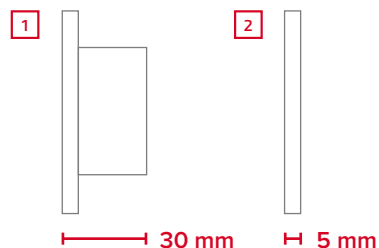

Additional comfort in the bathroom: the TECEflushpoint pneumatic toilet remote control

Whether you want greater freedom of movement or simply more design freedom: pneumatic actuation as an alternative to conventional actuation simply creates more scope. Especially when it not only blends into any bathroom with ease, but can also be installed on the existing cistern in no time at all.

Design meets surface feel

When developing TECEflushpoint, we focussed heavily on an attractive design that would fit into any bathroom. At the same time, all the components have been optimally matched to each other to ensure that flushing is also a pleasant feeling on the surface.

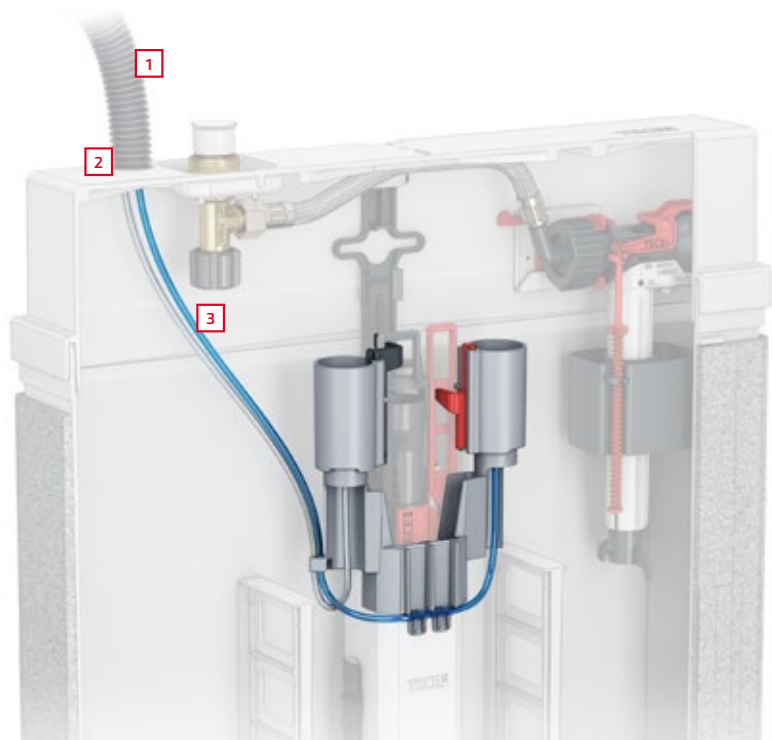

- 1 Single-flush system
- 2 Dual-flush system

TECEflushpoint flush plates are available for single and dual-flush systems with square or round covers and in white, matt chrome and polished chrome.

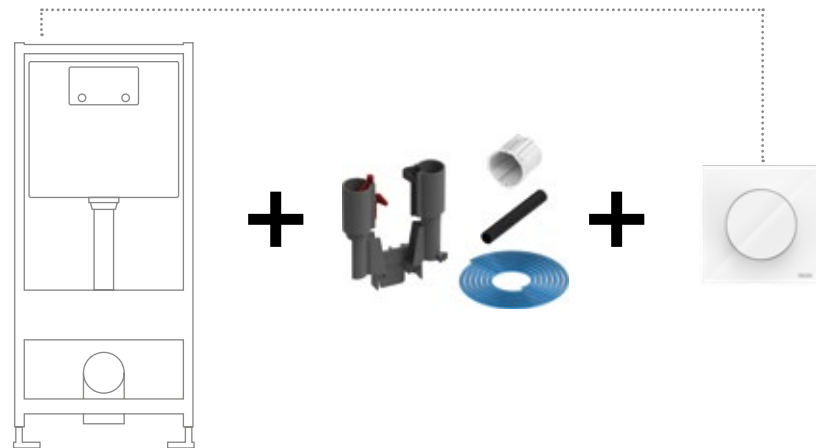

One-click installation

Conversion can be this easy:

The actuator for pneumatic operation is placed on the drain valve with a single click. For inserting the pneumatic hose into the cistern, the cistern is provided at the factory with a pre-punched opening that can be easily pierced.

- 1 Corrugated pipe
- 2 Pre-punched hole
- 3 Pneumatic hose

The pneumatic toilet flush with TECEflushpoint always consists of:

Toilet module with Octa cistern

TECEflushpoint shell set for Octa cisterns

TECEflushpoint fine installation set in various designs

Product Highlights

- Pneumatic toilet remote control for single and dual-flush systems
- Can be used with all manual TECE flush plates or alternatively with inspection flap/opening
- Can be used in solid and dry-wall construction as well as furniture installation
- Design and feel of the remote control at the highest level
- Operating radius of up to 1.7 m
- Actuator is only clicked onto the drain valve; no further modifications to the cistern necessary

The TECEflushpoint range

Image	Description	Colour/remarks	Item no.
	Pneumatic remote control for Octa cistern for decentralised cistern actuation in combination with a manual TECE flush plate or an inspection cover	Consisting of: Pneumatic actuator for Octa cistern, flush-mounted socket, 2 m pneumatic hose, 2 m conduit	9240977
