EVERYTHING THAT FRESHNESS NEEDS

TECEneo – the intuitive shower toilet for perfect cleanliness.

Sanitary systems close to you

SIMPLY CONVINCING

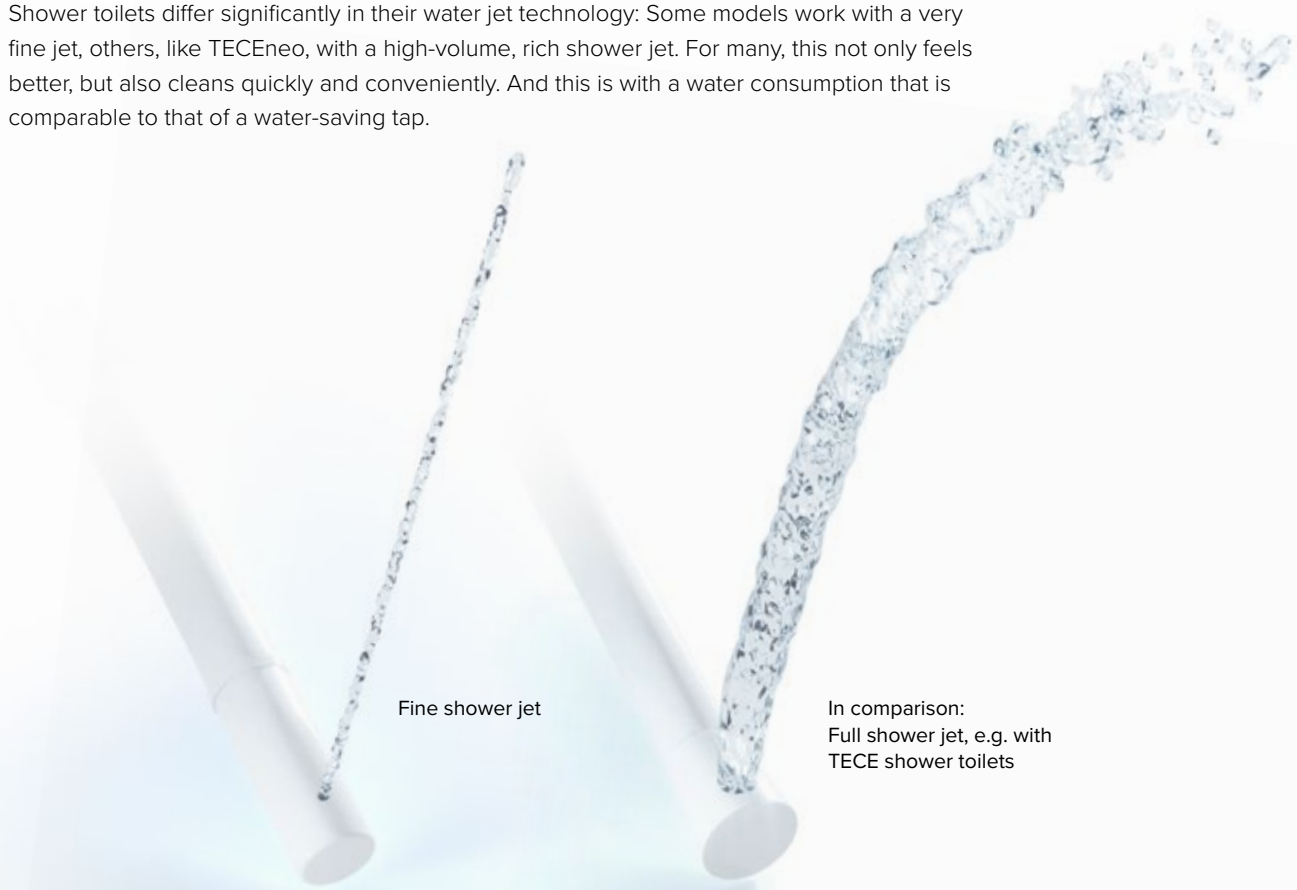
More and more people are turning to shower toilets. The models on offer differ fundamentally in the type of shower jet, the complexity of operation and the technology used. Discover what really matters with TECEneo.

SO FRESH & CLEAN

Thorough and hygienic cleaning: That's the most important task of a shower toilet. The best way to do this is with a pleasantly soft and rich jet of water. Like with TECEneo.

Best cleaning

Shower toilets differ significantly in their water jet technology: Some models work with a very fine jet, others, like TECEneo, with a high-volume, rich shower jet. For many, this not only feels better, but also cleans quickly and conveniently. And this is with a water consumption that is comparable to that of a water-saving tap.



Fine shower jet

In comparison:
Full shower jet, e.g. with TECE shower toilets

" A shower toilet that simply cleans properly. That's important to me! "

A pleasantly rich and full jet of water cleans quickly and thoroughly. TECE shower toilet technology has proven this with an excellent test result in a major shower toilet comparison by a German university. Showering fun that can be quick, but doesn't have to be: Because TECEneo offers a full volume of water without waiting, as often and as long as you want - with fresh water straight from the tap.

" A shower toilet that’s
really easy to use.
That's important to me! "

So easy to use

Turn on the water and set the temperature with two rotary knobs - a principle as simple as a shower tap. And so easy to understand that anyone, from young to old, be it family member or guest, can operate TECEneo intuitively.

IT'S THAT EASY

Turn on, turn off, done. With TECEneo, using the shower toilet is as easy as washing your hands. Because technology should make life easier. Not more complicated.

Turn once with your hand and the showering process begins. On the other side, the desired feel-good temperature is set continuously.

Focussed on the essentials

Sustainability starts with the question: "What do I really need?" It's not about doing without, but about focussing on the essentials. For TECEneo, we have therefore consistently focussed on an exceptionally good core function.

SO SUSTAINABLE

Is having really better than needing?
What do you need more than water
if you want to get clean?
TECEneo has nothing you don't
need. And everything you're
looking for.

Hand on heart

How often have you wished your toilet lid would open by itself? How likely is it that you only dry your bottom with a toilet dryer and no longer use toilet paper? Unlikely? We think the same.
Or: How does this sound to you? A shower toilet that works entirely mechanically using water pressure. No malfunctions, no standby consumption because it works entirely without electricity. Better? Then TECEneo is your shower toilet.

THIS IS TECEneo

A design toilet that not only cleans, but is also easy to keep clean. Designed to simply make everyday life easier.

Hygienically clean

is the shower arm, which is completely rinsed before and after each use when it is extended and retracted.

Thorough and quiet –

The TECEneo cyclon flush, which effectively flushes out the toilet ceramics in a powerful vortex and is remarkably quiet at the same time.

Water and dirt-repellent

The water- and dirt-repellent cera clean surface coating, on which the water rolls off and simply takes the dirt with it, is effective against dirt and residue.

Clean in one wipe

Thanks to the rimless design, no dirt remains hidden.

Chic and comfortable –

The ergonomic Slim toilet seat and lid with lowering system, which is simply pushed onto the permanently wobble-free moulded bolts during installation.

Right into the corners

TECEneo can also be cleaned around the seat and hinges. The seat and cover can also be easily removed thanks to the pre fix attachment.

ADD ACCENTS

One design shower toilet, many possibilities.
With matching design flush plates and controls,
TECEneo fits perfectly into any bathroom.

Scores points with variety

Brushed stainless steel is durable and now even more attractive in everyday use thanks to the anti-fingerprint coating. The matching TECEloop flush plate picks up on the shape and material of the TECEneo controls included as standard and is available in many exciting material and colour combinations.

In a single style

Black matt details and fittings are the new classics in bathroom design. With the elegant dark stainless steel flush plate on the design shower toilet and matching current TECE flush plates, you can design your bathroom consistently in a single style.

Function as required

One ceramic, various fittings:
Would you like to upgrade your bathroom with a shower toilet, but don't want to lay new electricity or hot water pipes? Or are you looking for a conventional toilet to match your shower toilet? TECEneo offers the perfect alternative for the toilet family in the cold water-only version or as a conventional toilet without shower function.

With hot/cold shower function

With shower function, without hot water connection

Without shower function

Smart solutions

Thanks to self-explanatory graphics directly on the button, users know what they need to do at a glance. Another smart feature is the intelligent TECElux-Mini toilet flush plate, which brings even more hygiene to your everyday life with touch-free activation and person recognition.

Fine-tuned

Design is a question of details. In the standard version with elegant matt stainless steel, the controls are also available in a matt black version or in plastic with self-explanatory labelling (for temperature and volume).

CEREAL
KINFOLK

SIMPLY GREAT

TECEneo is a genuine design toilet that blends easily and attractively into any modern bathroom environment thanks to its high-quality ceramic and elegant shape, as well as the absence of disruptive separate control units. With controls in various visual designs as a stylish detail.

SO STRESS-FREE

With TECEneo, high quality meets proven technology and clever product details.

Quick and easy to install

Professionals usually need little more than 30 minutes for installation and commissioning. Less than 5 minutes for familiarisation.
The ceramic with concealed fixing technology can be easily slid onto the threaded rods in the wall. The clamping wedge can then be turned upwards with adjusting screws until the ceramic is fastened to the wall.

Quick installation: also thanks to the concealed fastening with clamping wedge fixation

On the wall in a flash: TECEneo is delivered in installation-friendly packaging. For the water connection, TECEneo is pushed against the wall without straining your back, then lifted against the wall and firmly fixed using concealed clamping wedges.

Thanks to pre fix fastening technology with bolts that are permanently fixed without wobbling at the factory, the toilet seat is easy to attach and just as easy to remove again if required.

Simply explained

Simple technology and intuitive operation - everything is explained in 5 minutes.

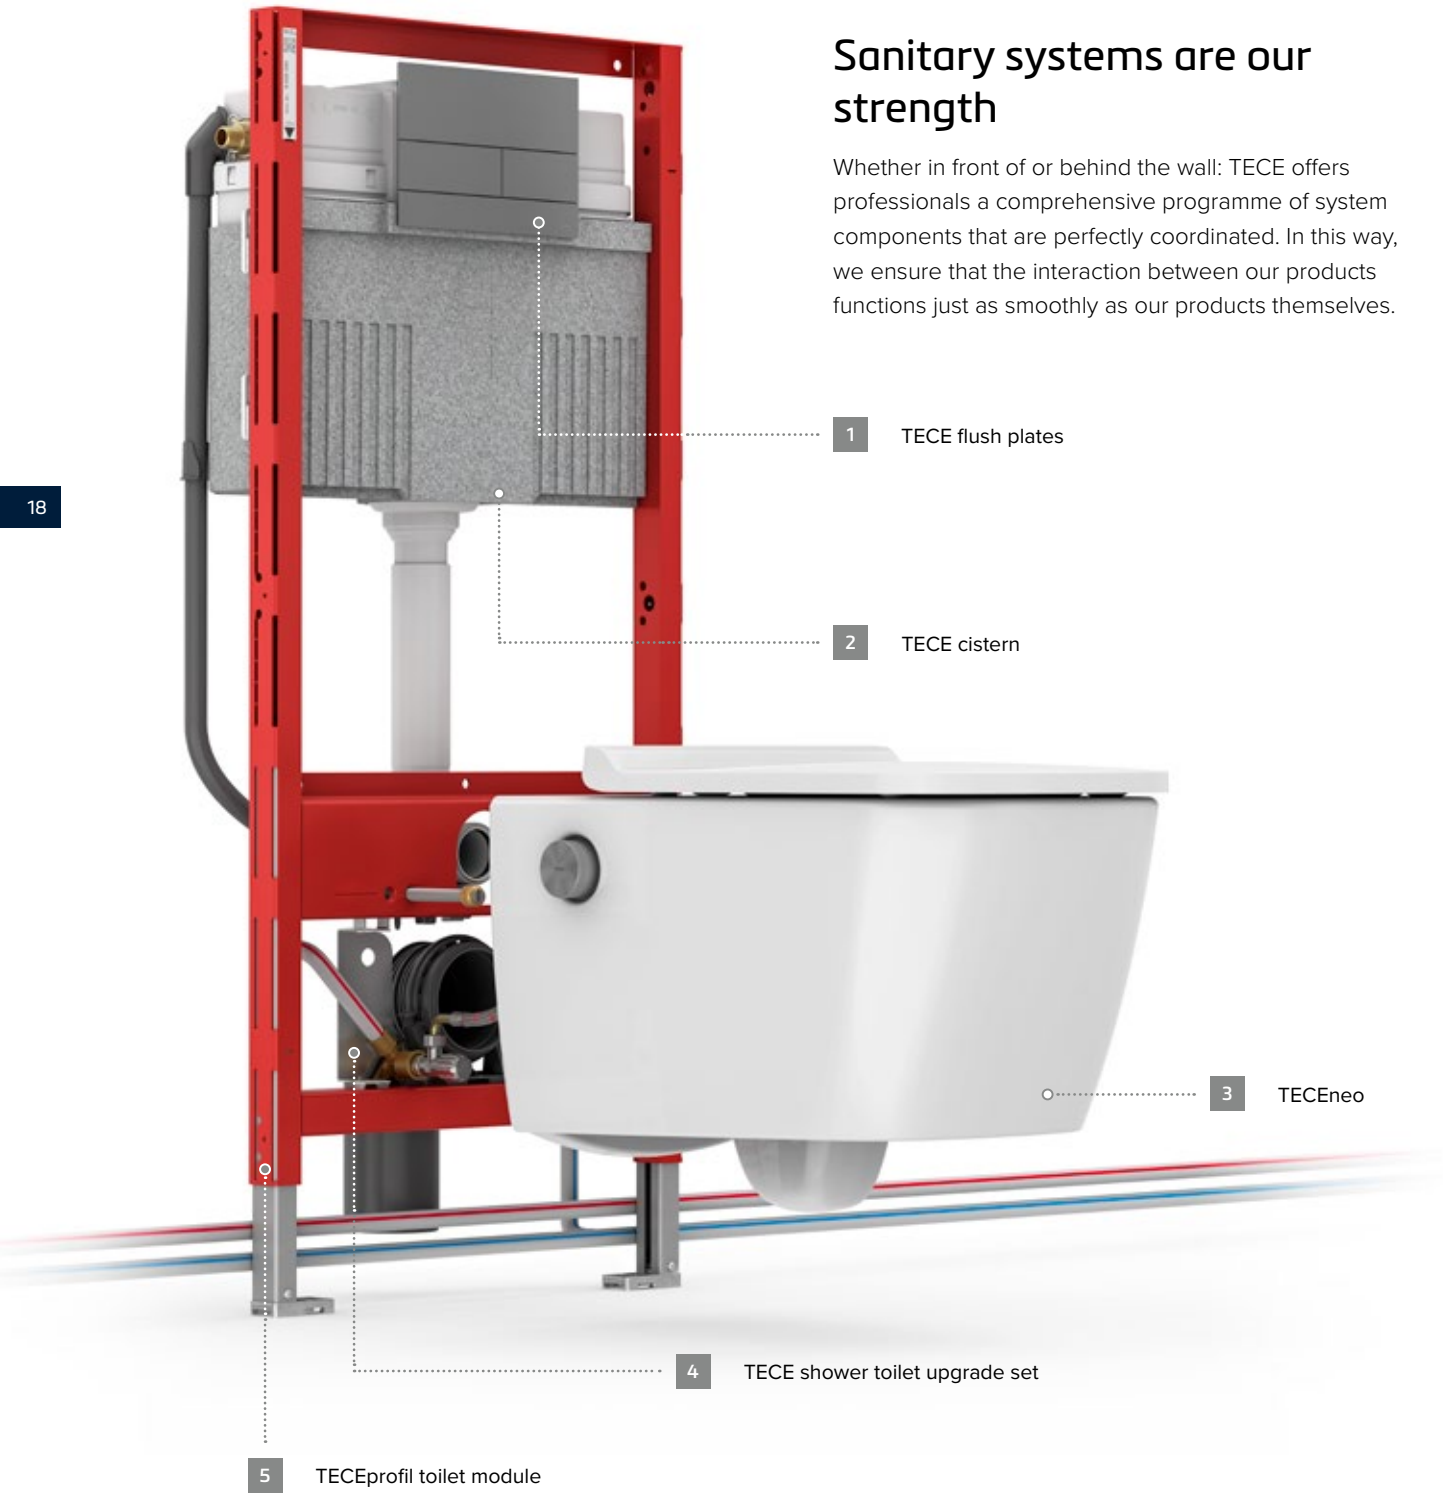
Stress-free in the long term

No electricity means no heating elements or instantaneous heater, no delicate electronics - and less stress. The cartridges can be removed without removing the toilet from the wall. The shower arm and nozzle caps can also be very easily exchanged.

1 Easy exchange of cartridges and volume cartridges
2 Easy exchange of the shower arm
3 Easy exchange of the thermostat cartridge

TECEneo IN THE SYSTEM

System technology makes all the difference. Because a product only achieves its full efficiency in the system. And becomes a holistic solution.



Sanitary systems are our strength

Whether in front of or behind the wall: TECE offers professionals a comprehensive programme of system components that are perfectly coordinated. In this way, we ensure that the interaction between our products functions just as smoothly as our products themselves.

Perfectly combined in front of and behind the wall

A TECE shower toilet combined with the TECElux toilet module - not just a visual highlight. TECElux combines technology and design so beautifully and intelligently that it has already received multiple awards for it.

TECElux toilet terminal

- Night light with adjustable proximity sensor
- Sensor flush actuation with programmable functions
- Odour filter for pleasant room air
- Subsequent seat height adjustment
- Easily accessible system parts concealed behind the wall

IN A DOUBLE PACK

One shower toilet philosophy,
two attractive designs:
Discover intuitive freshness
with our popular and proven
TECEone shower toilet.

Already a classic today

With its clear design and intuitive operation, TECEone is already a proven piece of extra comfort in many hotels and private households worldwide for all those who want shower toilet purity but can do without complicated technology and applications. Discover TECEone fully equipped or for retrofitting without hot water connection.

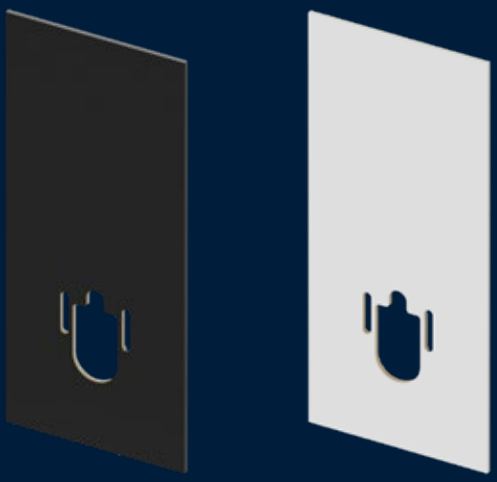
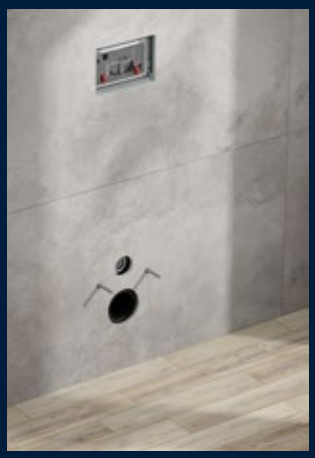
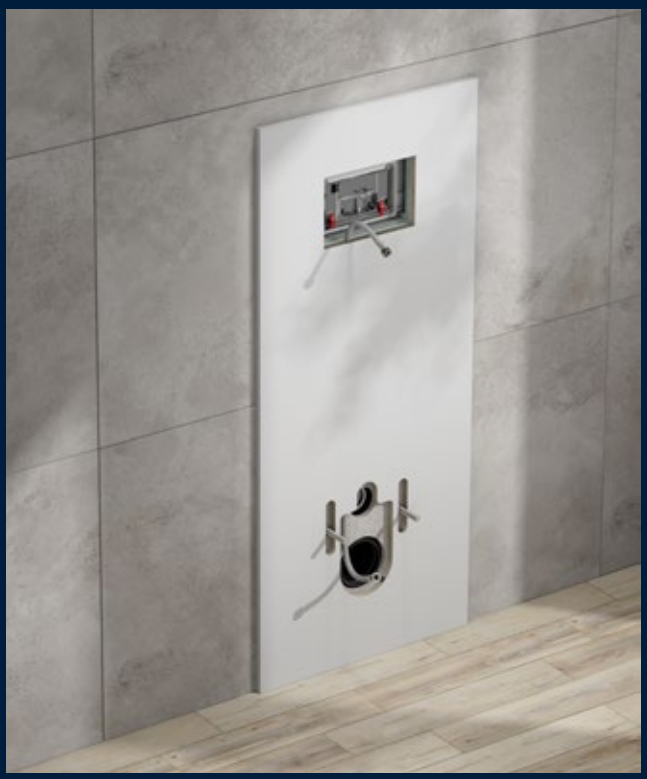
SHOWER TOILET FOR RETROFITTING

TECE shower toilets are not only a real benefit for new builds. TECE shower toilets with a cold water-only function can also be easily retrofitted in existing buildings and without an existing hot water connection. Thanks to the attractive TECE retrofit design cover, replacement is almost effortless and requires no drilling or chiselling. And the result? It simply looks good!





Attractive function and look
The velvet-matt retrofit design covers are elegant, abrasion and scratch-resistant and have an anti-fingerprint coating. The cut-out for the flush plate is simply cut into the moisture-resistant, pressure-resistant sandwich panel using a jigsaw. On the back of the panel, which weighs just 6.7 kg, guide grooves for the reinforced hoses make it easier to install the shower toilet using the TECE fine installation set. All technology remains hidden behind the elegant surface.



Shower toilet retrofit in four easy steps:
Make a cut-out for the flush plate, connect the water, fix the plate and install a TECE shower toilet with cold water connection. Done.

See here how easy it can be to retrofit a TECE cold water shower toilet.
